About the Activity

The expert covered the significance and recent advancements in stock valuation during this session. He said that the notion of equity valuation is the foundation of the whole stock market system as it provides a wide variety of shares and the market being very volatile one must ensure that enterprises with bad fundamentals will lose value if one becomes myopic and misses out some relevant information. He further pondered students with the stock valuation methods such as present value, multipliers, and asset-based valuation models which are the fundamental domain of the topic.

Aligned Activity Outcomes with Objectives

Activity Objectives	Activity Outcomes
To know development in the equity valuation.	Participants have better understanding of the equity valuation i.e. meaning, key parameters, process, brief on methods of equity valuation.
