#### About the Activity

The first day of the session started with an excellent introduction to the basics of financial accounting and what are the uses of financial accounting in real life. As, there are different types of software that are being used for passing the financial transaction of accounts online like Tally, and Busy ERP this software has their own reputation but there are some flaws present in the software but the software about which we were told to use was has its functionality not only working in India but also it has its working present in outside of India and the software name is QuickBooks. On the first day a basic introduction to the software QuickBooks that what is this software was given and about a basic discussion of the functions of QuickBooks and how it is working in India and outside India, The course also provided knowledge of how a person can earn the money with the help of knowledge of this software because of its wide range availability of jobs also at good perks.

#### Aligned Activity Outcomes with Objectives

Activity Objectives	Activity Outcomes
1.To provide practical knowledge of software's to students.	Students gained knowledge about working of software.
2.To create Awareness of how financial accounting works online.	Students developed an understanding of how historical records are managed and presented.
3. To provide practical knowledge of engagement of students in proactive and thoughtful process.	Students developed an understanding about making of financial accounts by the software on its own.
