Bi-Annual REPORT

From the Desk of Dean

These are times of great pain, but also of great possibility.

As dean of Chitkara College of Pharmacy, I would like to express my gratitude to the CCP family for their outstanding achievements from "bench to bedside," which reflect our cooperative alliances. It's very easy, and it's certainly understandable, to feel exhausted and defeated by the challenges among us, but everyone of us are still engaged in research and teaching that contributes directly to finding solutions for our world on fire.

I want to congratulate everyone associated with CCP for making this session successful through their commitment and hard work, as well as by their camaraderie and professionalism, which helped to uphold the culture and legacy of CCP and helped the team to achieve NIRF top 20 ranking.

I will always be thankful for the efforts that the faculty and staff of our college have done for Chitkara College of Pharmacy. Also, I am optimistically excited about the future prospects of what we will achieve together in the upcoming years.

Dr. Thakur Gurjeet Singh
Dean, CCP

Editor's Note

It gives us immense pleasure in bringing out the Bi-Annual Report for the Session Jan-June '22, which is going to surely unfold the unraveled world of the most unforgettable and precious moments of our institution.

The passion of CCP's faculty for discovery has led them to some unusual places, and this magazine is the result of a tonne of hard work by every member of our pharmacy family.

This gazette includes several highlights, such as the patents filed by the faculty, as well as numerous activities that they have organised and took part in.

Much has been done in the past history of CCP and still more needs to be done in the years to come.

We anticipate the successful publication of our magazine and appreciate your feedback or reviews.

Dr. Arun Kumar

Dr. Manjinder Singh

Dr. Rajwinder Kaur

Dr. Deepinder Singh

From the Student's Desk

Being a member of CCP is an incredible honour and source of pride.

Every day we've spent at CCP has always been special. It provides us with one-of-a-kind experiences. We appreciate the help and guidance we received from our parents and teachers along the way.

Our instructors and staff never fail to inspire us, and their assistance is invaluable. We are grateful to the college for believing in us and giving us the opportunity to demonstrate our abilities.

The college has changed our personalities, and our future goals have become clearer. We are grateful to the college for providing guidance and inspiration to help us achieve our objectives.

That day is not far away when people will remember us with the name of CCP.

ABSTRACT

Chemotherapy is the first choice in the treatment of cancer and is always preferred to other approaches such as radiation and surgery, but it has never met the need of patients for a safe and effective drug. Therefore, new advances in cancer treatment are now needed to reduce the side effects and burdens associated with chemotherapy for cancer patients. Targeted treatment using nanotechnology are now being actively explored as they could effectively deliver therapeutic agents to tumor cells without affecting normal cells. Dendrimers are promising nanocarriers with distinct physicochemical properties that have received considerable attention in cancer therapy studies, which is partly due to the numerous functional groups on their surface. In this review, we discuss the progress of different types of dendrimers as delivery systems in cancer therapy, focusing on the challenges, opportunities, and functionalities of the polymeric molecules. The paper also reviews the various role of dendrimers in their entry into cells via endocytosis, as well as the molecular and inflammatory pathways in

Abstract

MicroRNAs (miRNAs) as therapeutic agents have attracted increasing interest in the past decade owing to their significant effectiveness in treating a wide array of ailments. These polymerases II-derived noncoding RNAs act through post-transcriptional controlling of different proteins and their allied pathways. Like other areas of medicine, researchers have utilized miRNAs for managing acute and chronic wounds. The increase in the number of patients suffering from either under-healing

The Book Title Challenge Contest was organized by CCP Library on dated 18 th May 2022. The objective for this contest was to give awareness about title information of books available in our Library. There were total no. of 48 participants in which all the students were from our Pharmacy College. They participated in this contest very enthusiastically. The titles of the books were related to pharmaceuticals that were available in only in our CCP Library. The categories of books were text books, reference books and some were light readings. Maximum students had given the right answers for the light reading and text books titles. The venue for this contest was CCP Library, Fleming Block, 1 st floor.
