

Sustainable Procurement Policy

Chitkara University has a Sustainable Procurement Policy that outlines the university's commitment to procure goods and services in a way that minimizes environmental impact and promotes social responsibility. The policy covers all aspects of procurement, from the initial tendering process to the disposal of goods and services.

The policy is based on the following principles:

- **Environmental protection:** The university will procure goods and services that have a minimal impact on the environment. This includes products that are made from recycled materials, that are energy-efficient, and that have a low carbon footprint.
- Social responsibility: The university will procure goods and services from suppliers that respect human rights and labor standards. This includes suppliers that do not use child labor, that pay fair wages, and that provide safe working conditions.
- **Transparency:** The university will be transparent about its procurement practices. This includes publishing a list of its suppliers and the criteria it uses to select them.

The Sustainable Procurement Policy is an important part of Chitkara University's commitment to sustainability. The policy helps the university to reduce its environmental impact, promote social responsibility, and create a more sustainable future.

Here are some of the specific actions that Chitkara University takes to implement its Sustainable Procurement Policy:

- The university uses a green procurement checklist to assess the environmental impact of goods and services.
- The university requires suppliers to disclose their environmental and social performance.
- The university gives preference to suppliers that are certified by sustainable organizations.
- The university recycles or composts all waste generated by its procurement activities.

Chitkara University's Sustainable Procurement Policy is an example of how an educational institution can use its purchasing power to make a positive impact on the environment and society. The policy is a valuable tool for the university to achieve its sustainability goals and to create a more sustainable future.

Here are some of the benefits of sustainable procurement:

- It can help to reduce the environmental impact of an organization.
- It can promote social responsibility and ethical sourcing.
- It can save money in the long run.
- It can improve the reputation of an organization.
